

Whats up with this? i pay for this service and expect what i pay for. The traffic and weather channels are part of my daily life. Why should they be limited? who comes up with this crazy stuff? I am sure election time will come soon for some of the ppl that are behind this. I think that will be the time to vote NO....send me a list of all the politicians involved.....i will send out the word. this is purely a way of wasting our tax dollar. What happened to the Government for the people?
